

COMPANY OVERVIEW

Federal agencies and prime contractors need teams that can maintain RMF compliance, support personnel security, and fill specialized cyber roles without slowing mission delivery. Desra Group provides a principal-led W-2 delivery model supported by a qualified recruiting network, aligning ISSM/ISSO, FSO, GRC, cloud security, and technical staffing resources to each requirement. We help keep authorizations current, security functions responsive, and critical workstreams moving across federal defense, intelligence, RDT&E, and government healthcare requirements.

CORE COMPETENCIES

- **Cybersecurity & RMF/GRC:**
Alignment with CNSSI 1253, NIST SP 800-53, and FedRAMP compliance for DoW, IC, and federal agency systems.
- **Information System Security:**
Development of SSPs, POA&Ms, CONOPS, and incident response strategies.
- **Facility Security Operations (FSO):**
Facility Security Officer (FSO) services: NISPOM compliance, personnel security clearance management via DISS/NBIS, self-inspections, and classified area controls.
- **W-2 Mission Staffing & Augmentation:**
Principal-led W-2 delivery model and qualified recruiting network for security-focused cyber, systems, cloud, and healthcare IT roles.
- **AI & Cloud Security:**
Secure deployment and accreditation of AI/LLM systems within classified/CUI environments and AWS GovCloud.

DIFFERENTIATORS

- **Security Requirements Awareness:**
Principal-led oversight designed for classified, controlled, and regulated environments, with personnel-security, FSO, and NISPOM support capabilities.
- **Deep Compliance Expertise:**
Hands-on proficiency with e-QIP, JPAS/DISS, ICD 503, DISA STIGs, SCAP, ACAS, and eMass.
- **Integrated Delivery:**
Cybersecurity, facility security, cloud, enterprise IT, staffing, and healthcare compliance support coordinated through one delivery model.
- **Bench-Ready Delivery Model:**
Scalable W-2 staffing approach, supplemented by qualified recruiting and partner networks, to align talent with mission requirements.
- **Zero Trust & DevSecOps Support:**
Security architecture, DevSecOps, continuous-monitoring, and compliance support aligned to mission and customer requirements.

DELIVERY BENCH & CREDENTIALS

- **Clearance-Ready Staffing:**
Recruiting and staffing capability for roles requiring Secret, Top Secret, SCI, and SAP access, subject to customer adjudication and program requirements.
- **Credential-Aligned Talent:**
Recruiting and delivery channels for personnel holding Security+, CASP+, CISSP, CISM, PMP, and comparable cybersecurity, IT service, and program credentials.
- **Cybersecurity Roles:**
ISSO, ISSM, FSO, GRC analyst, cloud security engineer, systems engineer, security administrator, and technical program support.
- **Flexible Delivery Structure:**
W-2 team development supported by qualified recruiting, independent-consultant, and teaming-partner channels to match demand.
- **Mission-Experienced Leadership:**
Principal-led oversight informed by work across DoW, Space Force, IC, RDT&E, simulation/AI, and government healthcare environments.

HOW WE SUPPORT YOUR MISSION

- **Embedded Security Support:**
ISSO, ISSM, FSO, GRC, and security-engineering support aligned to program offices, prime-contractor teams, and regulated operational environments.
- **RMF & Authorization Surge Capacity:**
Focused support for SSPs, control implementation, POA&Ms, ATO packages, continuous monitoring, vulnerability remediation, and assessment preparation.
- **Clearance-Ready Workforce Delivery:**
W-2 team development, direct-hire recruiting, and qualified delivery channels for personnel supporting Secret, Top Secret, SCI, and SAP requirements.
- **Flexible Engagement Models:**
Short-duration surge support, long-term embedded resources, project-based compliance execution, and scalable staffing tailored to customer requirements.
