

COMPANY OVERVIEW

Desra Group is a technology-enabled workforce and mission-delivery partner for federal agencies, prime contractors, healthcare organizations, and other regulated environments. We provide contract staffing, subcontracted professional services, cybersecurity and RMF support, and program execution to move critical initiatives forward. Each engagement is requirement-led: Desra can lead, staff, partner, subcontract, or directly deliver the technical and operational capability needed to achieve the mission.

CORE SERVICE LINES

- **Technology Workforce Solutions:**
Contract staffing, staff augmentation, subcontracted professional services, and direct-hire recruiting for technical and operational roles.
- **Cybersecurity, RMF & GRC:**
ISSO/ISSM support, security documentation, ATO sustainment, continuous monitoring, vulnerability remediation, and compliance execution.
- **Technology Program & Implementation:**
Program management, implementation leadership, systems coordination, vendor oversight, process improvement, and technical project delivery.
- **Facility & Personnel Security:**
FSO support, NISPOM, DISS/NBIS coordination, self-inspections, security awareness, and classified-area controls.
- **Regulated Operations & Healthcare:**
Operational leadership, practice management, workforce support, technology and workflow optimization, and organizational development.

DELIVERY MODEL

- **Requirement-Led Execution:**
Desra begins with the defined program, technology, compliance, staffing, or operational need and aligns the right delivery approach.
- **Lead, Staff, Partner, or Deliver:**
Depending on the requirement, Desra provides execution leadership, contract staff, subcontracted services, partner coordination, or direct technical delivery.
- **Principal-Led Accountability:**
Hands-on oversight connects customer priorities, delivery resources, implementation milestones, and operational outcomes.
- **Flexible Engagement Structure:**
Embedded support, project-based execution, short-duration surge capacity, staff augmentation, and direct-hire recruiting are available as needed.
- **Technology-to-Operations Alignment:**
We coordinate people, systems, vendors, partners, and processes to help complex initiatives move forward.

WORKFORCE & DELIVERY CAPACITY

- **Contract Staffing & Professional Services:**
Primary delivery channels include staff augmentation and subcontracted professional services, with direct-hire recruiting available when needed.
- **Clearance-Ready Talent:**
Recruiting and staffing capability for roles requiring Secret, Top Secret, SCI, and SAP access, subject to availability and customer requirements.
- **Credential-Aligned Resources:**
Talent channels include professionals holding Security+, CASP+, CISSP, CISM, PMP, and comparable cybersecurity, IT service, and program credentials.
- **Technical & Operational Roles:**
ISSO, ISSM, FSO, GRC analyst, project/program manager, systems engineer, cloud security engineer, practice-operations, and technical support roles.
- **Scalable Capability Network:**
Qualified recruiting, independent-professional, subcontractor, and teaming-partner channels allow delivery capacity to scale with the requirement.

HOW WE SUPPORT YOUR MISSION

- **Contract Staffing & Staff Augmentation:**
Provide qualified technical, security, operational, and healthcare professionals as embedded resources or project support aligned to customer needs.
- **Subcontracted Professional Services:**
Deliver specialized professional services through Desra-managed resources and partner channels for programs requiring defined expertise or surge capacity.
- **Program & Implementation Leadership:**
Coordinate requirements, people, systems, vendors, workstreams, milestones, and operational decisions so complex initiatives advance with accountability.
- **Requirement-Based Technical Delivery:**
Lead, staff, partner, subcontract, or directly deliver technology and operational work based on the scope, internal capacity, and customer requirements.
